Troop Trophy

$$6^{\text{th}} \quad 3 + 1 = 4$$

$$9^{\text{th}} \quad 2 + 5 + 2 = 9$$

$$10^{\text{th}}/18^{\text{th}} \quad 1 = 1$$

$$17^{\text{th}} \quad 1 + 3 = 4$$

1 Point for each team member attending

Other points awarded for final positions.

District Chess

Scout Section

18th January 2003

17th HQ

Winner	Billy Marbe (9th)
2 nd Place	Adam Cutmore (17 th)
3 rd Place	Tobi Trott (9 th)
Troop Trophy	9th

The competition was run using the Swiss System. The final scores and positions are noted here.

[Note: the idea of the Swiss System is that players are always playing against opponents of the same skill level and that no one is knocked out and they all get to play the full number of games.]

A big THANK YOU to:

17th and their leaders : for hosting the event and keeping us 'refreshed'

Leaders & parents : for helping in all matters including judging

Chris Cridland : For running the scout competition

Winner	Lewis Sibbons (9 th)
2 nd Place	Jack Bishop (17 th T)
3 rd Place	Jack Simmons (17 th U)

The competition was run using the Swiss System. The final scores and positions are noted here.

[Note: the idea of the Swiss System is that players are always playing against opponents of the same skill level and that no one is knocked out and they all get to play the full number of games. If the points are tied then position is decided by looking at the scores of your opponents...if you have been playing against stronger opponents than you win the 'tiebreak']
